POST-OPERATIVE CATARACT INSTRUCTIONS

THE FOLLOWING ARE SOME IMPORTANT CONSIDERATIONS REGARDING THE FIRST WEEK FOLLOWING YOUR SURGERY:

1. **Expect mild scratchiness, irritation, and/or discomfort. Also expect blurred vision for 3-5 days after surgery.**
2. **Do not rub or scratch your eyes.**
3. **Take Tylenol or other aspirin-free pain reliever as needed for pain.**
4. **Before lying down or going to bed, place the clear plastic shield over your operated eye with the provided tape.**
5. **Wear some protection over the operative eye during the day, such as sunglasses provided in your post-op bag.**
6. **If you experience any problems other than those relayed to you by myself or my staff, please do not hesitate to call our office at (706) 323-8127, or for EMERGENCIES my cell phone # is: (706) 536-2727.**
7. **You may return to work after your one day post op appointment.**
8. **See reverse side for medication instructions.**
